

## CIVIL ENGINEERING AutoCAD TECHNICIAN/DESIGNER

Our Civil Engineering firm has openings for a Civil Engineering AutoCAD Technician/Designer to join our dynamic team in our Fort Myers office.

### **DESCRIPTION:**

This position will use verbal directions and engineering data to prepare drawings that meet company quality objectives and client standards using AutoCAD and Civil 3D. They will have the ability to apply sound engineering principles to the development of detailed design drawings, under the guidance and direction of project managers. The individual will be responsible for the design and development of drawings of residential and commercial projects including all phases of land development: site layout, utilities, grading and drainage.

### **DESIRED QUALIFICATIONS:**

- Minimum of 1 to 3 years AutoCAD & Civil 3D experience preferred.
- The successful candidate will be detail oriented.
- Team oriented individual that works in cooperation with others to satisfy the overall project objectives.
- Self-motivated and capable of satisfying multiple project requirements simultaneously within a deadline sensitive environment

**COMPENSATION:** Pay will be set based on experience and capability. Company provides free health care and 401K matching benefits.
