

## SURVEY TECHNICIAN

Our civil engineering firm has an opening for a Survey Technician to join our dynamic team in our Fort Myers office.

### DESCRIPTION:

2-5 years experience, in the survey field with emphasis on office related skills including CADD use, research experience within the various county and state governments and computational ability with detailed working knowledge and application of related computer hardware and software.

- Experience in the preparation of various types of surveys, condominium exhibits and subdivision plats. Technician should have basic knowledge of the principles of the profession; standards of practice required by law and have good understanding of coordinate geometry.
- Background in research of land records, advanced mapping skills and understanding of legal documents utilized in the preparation of various types of surveys.
- Proficient with CADD, (preferably release 2000 or better) SurvCADD XML 2002 experience a plus. Basic word processing skills and familiarity with Microsoft word.
- Advanced knowledge in the preparation of various types of legal descriptions typically generated throughout the site development process.
- Must be a reliable self-motivated team player and have the ability to work through various survey related tasks with minimal oversight.
- Basic knowledge of field operations and procedures. Advanced knowledge of field notes reduction and plan interpretation a plus.
